

# ENVIRONMENTAL OFFICER RESPONSIBILITIES

---

Our brands offer distinct cruising options along with a truly unique and memorable experience for our guests. As different as our brands are, they all share a commitment to protecting the beautiful and often pristine environments in which we cruise. Because of this shared sense of responsibility, the company carefully manages environmental activities and addresses environmental compliance and stewardship at every level of our organization.

Each ship in our fleet has a full-time Environmental Officer (EO), who monitors environmental compliance and the implementation of environmental procedures as well as supporting shipboard teams with their environmental compliance needs. Each EO reports directly to the ship's Captain and has a direct line of communication with their Compliance Officer ashore.

Our brands also encourage our guests to be aware of their own impacts on the environment. We provide, for example, environmental awareness information to passengers across a range of media. Our EOs are glad to answer any environmental questions our guests may have and provide insight into maritime environmental management for interested guests.

## Scope of Environmental Officer Responsibilities:

- Monitoring the ship's environmental compliance activities, including waste operations.
- Performing environmental rounds and inspections to assess the ship's compliance with Company and regulatory environmental requirements around the world.
- Assisting the crew in addressing environmental concerns and questions related to Carnival's Environmental Management System and applicable environmental requirements.
- Providing, assessing and verifying completion of environmental shipboard training for all crew members.
- Assessing the environmental proficiency of the ship's crew, identifying gaps and providing additional training if necessary.

- Aiding the Captain, Chief Engineer and local authorities, in the event of accidental releases or spills.
- Participating in shipboard management meetings and ensuring that environmental matters are addressed.
- Evaluating and suggesting new methods to minimize the ship's environmental impact (waste minimization, water and energy conservation, and other measures).
- Reviewing environmental restrictions in support of voyage planning.
- Providing assistance to internal and external auditors during environmental audits.
- Ensuring proper notification of all environmental incidents, as required.
